### **Eberl Iron Works Launches RTS Rooftop Support Systems.**

Buffalo, NY, August 24, 2009 – George and Frank Eberl today announce Eberl Iron Works' latest products division, RTS Rooftop Support Systems. "Frank and I are excited about how our RTS Division will add a new revenue stream to our business and allow for market expansion," says George J. Eberl, Co-owner of Eberl Iron Works, Inc. "RTS will enable us to offer our products and first-rate customer service to a larger variety of customers. We will streamline the ordering process and we have engineered systems that are delivered pre-assembled instead of employees building the systems on the jobsite." In the making for 5 years, RTS Rooftop Support Systems provide customers with innovative and economical solutions for non-penetrating rooftop support systems. RTS division will be headed by George Hartman, RTS Specialist. To find out more information on Rooftop Support Systems and their products visit their interactive website at [www.rooftopsupportsystems.com](http://www.rooftopsupportsystems.com)

It is through diversification that Eberl Iron Works continues to find new and better ways to provide solutions for our wide range of customers. By integrating all of the current products and installation capabilities, RTS can provide companies with a custom design build solution for all rooftop pipe, HVAC conduit, duct support, solar PV, crossovers, and walkway systems. Eberl Iron Works recognizes that solar energy is a tremendously growing power source and is prepared to meet with the market demand with HVAC, electrical and solar power installation hardware.

#### **About RTS Rooftop Support Systems**

Using 100% recycled rubber bases and 100% recycled plastics, RTS Rooftop Support Systems are environmentally friendly, helping to extend roof life while providing stable support for the equipment. Our system design allows customized components to fit specific applications making RTS the best choice for pipe, HVAC conduit, duct support, crossovers, and walkway systems.

#### **About Eberl Iron Works, Inc**

Founded in 1923 by George and Frank Eberl, Eberl Iron Works, Inc. has 5 divisions headquartered in Buffalo, New York (NY). Eberl Iron Works has grown from a small welding shop to a leading metal fabrication distribution and installation group providing the highest quality products and services critical in today's market. The Eberl Team's commitment to excellence is integral to our 86+ year old family owned and operated business. Accountability is our pledge to our customers – from the products we manufacture to the systems we install. Eberl Iron Works, Inc. continues to develop metal fabrication products and services, expanding our distribution of framing and traffic safety products as well as integrating additional installation capabilities to meet our customer's most challenging needs.
